ODH Foundation Backend — Complete API Endpoint List

Base URL (local): http://localhost:3000 | Generated 16 July 2026 | Every route below actually exists in the running backend as of this date.

1. Content Collections — 14 collections x 6 standard routes each

Every collection gets the same 6 routes automatically. Only the leading path segment changes.

Users (staff accounts)

GET	/api/users	List (paginated, filterable, sortable)
GET	/api/users/:id	Get one document by ID
GET	/api/users/count	Count matching documents
POST	/api/users	Create a new document
PATCH	/api/users/:id	Update a document
DELETE	/api/users/:id	Delete a document

Media (Photos)

GET	/api/media	List (paginated, filterable, sortable)
GET	/api/media/:id	Get one document by ID
GET	/api/media/count	Count matching documents
POST	/api/media	Create a new document
PATCH	/api/media/:id	Update a document
DELETE	/api/media/:id	Delete a document

Graphics (logos/icons/QR)

GET	/api/graphics	List (paginated, filterable, sortable)
GET	/api/graphics/:id	Get one document by ID
GET	/api/graphics/count	Count matching documents
POST	/api/graphics	Create a new document
PATCH	/api/graphics/:id	Update a document
DELETE	/api/graphics/:id	Delete a document

Documents (PDFs)

GET	/api/documents	List (paginated, filterable, sortable)
GET	/api/documents/:id	Get one document by ID
GET	/api/documents/count	Count matching documents
POST	/api/documents	Create a new document
PATCH	/api/documents/:id	Update a document
DELETE	/api/documents/:id	Delete a document

Pages (page builder)

GET	/api/pages	List (paginated, filterable, sortable)
GET	/api/pages/:id	Get one document by ID
GET	/api/pages/count	Count matching documents
POST	/api/pages	Create a new document
PATCH	/api/pages/:id	Update a document
DELETE	/api/pages/:id	Delete a document

Project Categories

GET	/api/project-categories	List (paginated, filterable, sortable)
GET	/api/project-categories/:id	Get one document by ID
GET	/api/project-categories/count	Count matching documents
POST	/api/project-categories	Create a new document
PATCH	/api/project-categories/:id	Update a document
DELETE	/api/project-categories/:id	Delete a document

Projects

GET	/api/projects	List (paginated, filterable, sortable)
GET	/api/projects/:id	Get one document by ID
GET	/api/projects/count	Count matching documents
POST	/api/projects	Create a new document
PATCH	/api/projects/:id	Update a document
DELETE	/api/projects/:id	Delete a document

Team Members

GET	/api/team-members	List (paginated, filterable, sortable)
GET	/api/team-members/:id	Get one document by ID
GET	/api/team-members/count	Count matching documents
POST	/api/team-members	Create a new document
PATCH	/api/team-members/:id	Update a document
DELETE	/api/team-members/:id	Delete a document

Testimonials

GET	/api/testimonials	List (paginated, filterable, sortable)
GET	/api/testimonials/:id	Get one document by ID
GET	/api/testimonials/count	Count matching documents
POST	/api/testimonials	Create a new document
PATCH	/api/testimonials/:id	Update a document
DELETE	/api/testimonials/:id	Delete a document

Campaigns

GET	/api/campaigns	List (paginated, filterable, sortable)
GET	/api/campaigns/:id	Get one document by ID
GET	/api/campaigns/count	Count matching documents
POST	/api/campaigns	Create a new document
PATCH	/api/campaigns/:id	Update a document
DELETE	/api/campaigns/:id	Delete a document

Media Posts (news/blog/press/gallery/video)

GET	/api/media-posts	List (paginated, filterable, sortable)
GET	/api/media-posts/:id	Get one document by ID
GET	/api/media-posts/count	Count matching documents
POST	/api/media-posts	Create a new document
PATCH	/api/media-posts/:id	Update a document
DELETE	/api/media-posts/:id	Delete a document

Careers

GET	/api/careers	List (paginated, filterable, sortable)
GET	/api/careers/:id	Get one document by ID
GET	/api/careers/count	Count matching documents
POST	/api/careers	Create a new document
PATCH	/api/careers/:id	Update a document
DELETE	/api/careers/:id	Delete a document

Donations (finance/super-admin only)

GET	/api/donations	List (paginated, filterable, sortable)
GET	/api/donations/:id	Get one document by ID
GET	/api/donations/count	Count matching documents
POST	/api/donations	Create a new document
PATCH	/api/donations/:id	Update a document
DELETE	/api/donations/:id	Delete a document

Subscriptions (finance/super-admin only)

GET	/api/subscriptions	List (paginated, filterable, sortable)
GET	/api/subscriptions/:id	Get one document by ID
GET	/api/subscriptions/count	Count matching documents
POST	/api/subscriptions	Create a new document
PATCH	/api/subscriptions/:id	Update a document
DELETE	/api/subscriptions/:id	Delete a document

2. Globals — 3 site-wide singletons

Site Settings

GET	`/api/globals/site-settings`	Get the current value
POST	`/api/globals/site-settings`	Update the current value

Navigation

GET	`/api/globals/navigation`	Get the current value
POST	`/api/globals/navigation`	Update the current value

Donation Settings

GET	`/api/globals/donation-settings`	Get the current value
POST	`/api/globals/donation-settings`	Update the current value

3. Donation APIs (custom, hand-written)

POST	`/api/donate/initiate`	Validate + create donation, return PayU redirect params
POST	`/api/donate/webhook`	PayU server-to-server payment confirmation (verified hash only)
GET	`/api/donate/status`	Poll donation status by txnid (public-safe subset)

4. Authentication

POST	`/api/users/login`	Staff login (email + password)
POST	`/api/users/logout`	End the current session
POST	`/api/users/forgot-password`	Send a password-reset email
POST	`/api/users/reset-password`	Reset password using the emailed token

5. GraphQL

POST	`/api/graphql`	GraphQL endpoint (queries + mutations)

Note: PUT is not used anywhere in this backend — Payload uses PATCH for partial updates. Collections marked "finance/super-admin only" return 403 for anonymous or under-privileged requests by design, not as a bug.
